## SUMMARY:

The Rossvie JROTC/A.P.S.U. Dual Enrollment Course – Leadership in Community Emergency Response conducted hands-on training in the areas of fire extinguisher usage, blocking/cribbing and first aid to prepare them to respond in real world situations. Working in pairs or 6-person response teams, the cadets responded to each situation they were presented and gained situational knowledge beyond what they learned during classroom lectures. They also conducted a team building exercise using the cribbing material to play a friendly game of Jenga where they worked together to build a 5-foot tall tower.
