On March 29th our Rifle Team went down to Smyrna, TN where one of our National Guard posts are located. This team went to see what their simulated range was like, with M-16/4 simulated air rifles. Along with trying on some of the Army tactical gear, we got to explore a tank, The Bradley. It was a nice learning experience looking at how Soldiers are scored in the categories of Marksman, Sharpshooter, and Expert, two of our cadets even scored in the Marksman category. This experience helped our team by showing different techniques and showing how shooting can become what they do for a living.
