Roof Work Rule Reminders:

1. Warning line systems are only allowed as fall prevention on flat or *low sloped roofs* when the work takes place six feet or more from the roof edge or opening. The use of mechanical equipment may require additional distance from the edge or opening; refer to the complete rules.
2. When work on a flat or low sloped roof takes place less than six feet from the roof edge or opening, standard railing with toe boards or personal fall protection systems must be used.
3. Standard railing or personal fall protection systems must be used on *steep sloped roofs* regardless of the distance from the roof edge or opening.
